

A NEW STANDARD FOR WATER DATA QA/QC

KURT FERRELL | ACCOUNT EXECUTIVE

TOM JURENKA | APPLICATIONS ENGINEER

AQUATIC INFORMATICS

HELLO! MEET THE TEAM.

Kurt Ferrell

Account Executive
Aquatic Informatics

Tom Jurenka

Solutions Engineer
Aquatic Informatics

A close-up photograph of a person's hand held palm up, with water dripping from it. The hand is positioned over a body of water, creating ripples. The lighting is warm and golden, suggesting a sunset or sunrise. A teal-colored rectangular overlay is on the left side of the image, containing text.

OUR PURPOSE.

To protect LIFE with timely
WATER information.

THE PORTFOLIO

AQUARIUS

Analytics software for natural environments

GROUNDWATER

SURFACE WATER

RIO developed with

Compliance & Operational Data Management

DRINKING WATER

WASTEWATER

SEDARU

Asset Management & Work Order Management

DISTRIBUTION SYSTEM

PUBLIC UTILITIES

WIMS developed with

Water Information Management System

COMBINED SYSTEM

LAB MANAGEMENT

TODAY'S AGENDA

- Brief Introduction to Aquatic Informatics and the AQUARIUS System
- AQUARIUS & HydroCorrect Demo
- Summary
- Questions

HALF OF UTILITIES ARE DATA-RICH BUT NOT LEVERAGING IT EFFECTIVELY

according to a 2021 Black & Veatch Survey. The same report revealed that **95%** of respondents indicate a growing confidence in their sensor data, creating opportunity to be data-driven when provided with **data visibility & insights**.

POLL QUESTION

How does your organization currently manage environmental data?

- a. Spreadsheets
- b. Custom coded software
- c. Hydrologic software
- d. No data management system

SOLUTIONS FOR THE NATURAL ENVIRONMENT

Source
Water

Groundwater

Drinking
Water

Stormwater

1

**Centralize sample,
time-series, & other sources**

2

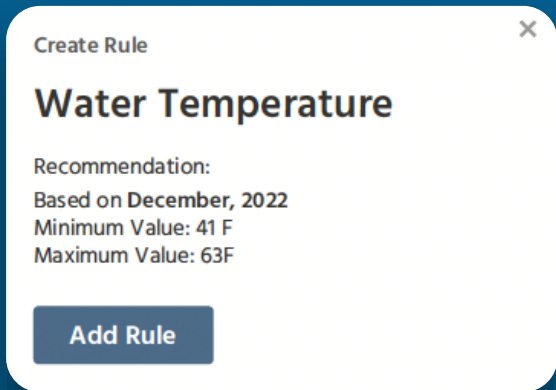

**Faster QA/QC using
automated review tools**

3

**Share contextual insights
with defensible data**

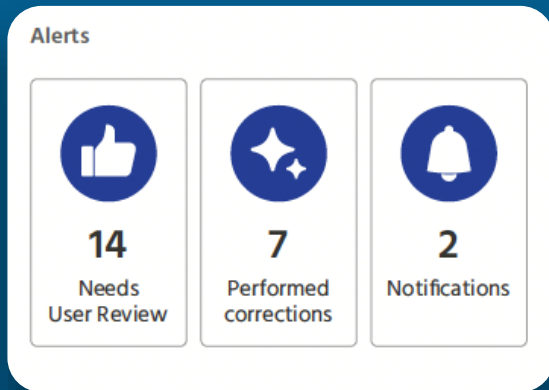

INTRODUCING HydroCorrect™

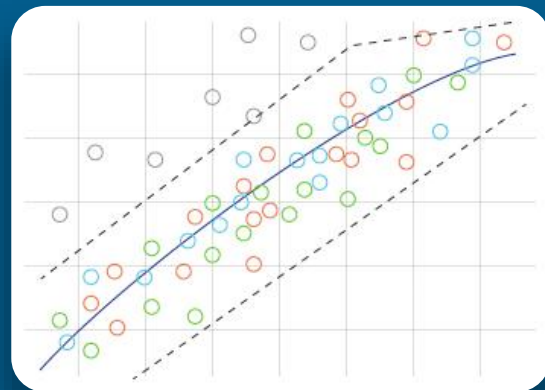

Easy to Configure & Use

A proprietary recommendation engine analyzes historical data and suggests rules that you can accept or reject based on your use cases and comfort level.

Centralized Management

Review data corrections suggestions and anomalies, make rule changes and adjust alert parameters quickly and conveniently all from the same intuitive dashboard.

Defensible Reporting

With data accuracy achieved in a fraction of the time, and data confidence higher than ever, reporting becomes a snap.

1 WEEK EVERY 2 MONTHS

Is how much time the average QA/QC professional in the water industry spends manually monitoring the accuracy of environmental data

WHAT YOU CAN NOW **ACHIEVE**

01 SAVE TIME

Decrease time
and resources spent
on QA/QC

02 DO MORE

Handle increasing
data volume with ease

03 ADDRESS ISSUES

Identify & address
data anomalies

04 IMPROVE SPEED

Reduce data latency
& improve quality

05 IMPROVE DEFENSIBILITY

Increase trust & reliability in
your data

- Trusted Automation
- Simple Rule Recommendation
- Data Estimation & Correction
- Enforce Data Quality

HydroCorrect

**What could you accomplish with
an extra month of working days
each year?**

THANKS!
