

PLANT PROFILE: CITY OF RAVENNA, OHIO

Equipment: Hi-Tech / Kusters Water model HBSL-S
(Straight Tube Clarifier)

Year Installed: 2014

Background: The City of Ravenna, Ohio has two Hi-Tech HBSL-S straight tube clarifiers. The first clarifier was installed in 2003, and after many years of successful service the City elected to procure a second Hi-Tech unit. The design engineer, CT Consultants, worked closely with the Hi-Tech team to ensure the new clarifier would be designed to meet and exceed the City's expectations. The new clarifier was placed into operation in the summer of 2014.

Waste Water Plant Superintendent Bill Bregant stated, "The clarifiers are both working great...we couldn't be happier and look forward to working with you again in 2017 on clarifier #1."

For information on Hi-Tech clarifiers, contact Jim Weidler, Vice President of Sales, at 1-800-264-7005 or jim.weidler@kusterszima.com.

Type H - Hydraulic Drive
